About Aroma

In 1977, Aroma Housewares set out on a mission:

"To design and distribute a line of products and services that enhance and enrich people's lives."

Aroma's unique products are sensible, stylish and improve the culinary experience for cooks of all ages and skill levels.

We strive to provide a cooking experience of convenience for delicious results each time you embark on a kitchen adventure.

Aroma's ability to continuously evolve and develop innovative products has been the staple of our existence.

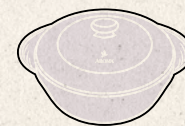

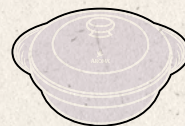

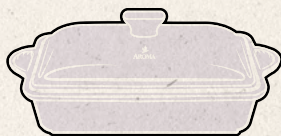

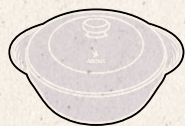

Please join us on a culinary journey that will tantalize your taste buds, highlight your appreciation of great food and change the way you live, love and eat!

**You Are The Potter,
We Are The Clay.**

DoveWare's Story

The embossed Dove design on Aroma's ceramic collection signifies the essentials for both a nutritious and meaningful meal. The dove itself is seen as a symbol of peace, love and purity; all can be implemented into your cooking experience with our cookware. Each ceramic piece is expertly crafted with non-toxic materials for tasty and healthy results. The love and support needed to deliver an enriching meal is brought to your kitchen through the handles of the cookware that emulate the wings of the dove.

The non-reactive ceramic cookware is made of 100% earthen materials, which allows flavors to work in harmony, resulting in delicious food—free of PFOAs, lead, and other harmful metals DoveWare will provide a healthier way of cooking for years to come.

DoveWare was designed with efficiency and innovation in mind. With its diverse craftsmanship, the possibilities are endless. Here at Aroma, we strive to distribute high quality products that enhance and enrich people's lives. DoveWare ceramic cookware is our next step in continuing our mission.

“They shall mount up with wings like eagles, they shall run and not be weary. They shall walk and not faint.”

The richness of purple and the light wash of blue presents us with a simple reminder of the royal and calming vastness of the sky—a place where the dove flies in harmony with peace and love.

Production

Our DoveWare products are each hand crafted and handled with the utmost precision from start to finish. We begin with all natural pottery clay selected precisely for its authenticity and guarantee that the material complies with both American and European standards to cook healthy and delicious food.

DoveWare is made exclusively with the mineral form, Spodumene. The mineral form is added to the clay giving DoveWare its flexural strength and thermal expansion characteristics for cooking versatility.

DoveWare ceramic features Far Infared Rays (F.I.R.) that offers even heat distribution with invisible waves of energy.

Artisan's technique of forming and molding our ceramics takes great skill and patience. The pieces are hand inspected and carefully polished before being dried and heated in the kiln. Spending roughly a week in the process, the dried ceramic is dipped into our distinct glaze, making sure every surface is covered smoothly and evenly for its final firing. Lastly, every piece of ceramic cookware goes through the most stringent quality control inspection and only the highest quality grade products are passed onto you.

Qualifications:

ISO 9001 (Quality)

ISO 14001 (Environmental)

OHSAS 18001 (Health and Safety)

Compliance:

CA Proposition 65

FDA

SGS

DoveWare™

Valuable Features

100% Natural Materials

Aroma DoveWare is made of a safe, non-reactive material for optimal results. It is non-toxic, heavy-metal free and PFOA free to ensure healthy cooking.

Thermal Shock Resistant

Save time and energy with Aroma DoveWare's shock resistant design. Your cookware can go straight from the freezer to the oven without risk of damage.

Versatile Cooking

Enjoy healthy and delicious meals with your new Aroma DoveWare. Refer to an old family classic or try an Aroma favorite. Whether you stew, bake, braise or slow cook, any and all of your favorite dishes will cook to perfection.

Easy Clean-Up

Forget about endless scrubbing and reclaim kitchen time as your time. Aroma DoveWare is dishwasher safe which makes clean up a breeze!

Questions? We have answers.

Materials

What raw materials are used in the making of DoveWare products?

DoveWare is made from natural products including clay. All of the raw materials used are food-safe and meet the most stringent food-use regulations, including CA Prop 65.

Use & Care

Do I need to pre-treat or season my pot?

No, there is no pre-treatment or seasoning needed.

How do I care for my DoveWare cookware?

All products should be carefully dried and stored with the lid slightly off-center, allowing for air circulation inside the pot.

What is the ideal temperature for cooking with DoveWare products?

It is best to use a low or medium heat setting with DoveWare products. This material is insulated and retains heat. Use high heat only when boiling water or reducing the consistency of stocks or sauces.

Product Warranty

Does DoveWare warranty their products?

DoveWare offers a five (5) year limited warranty against manufacturer defects. Warranty does not apply for commercial use.

Product Facts

What does “DoveWare products are thermal shock resistant” mean?

DoveWare products are unique ceramic cookware that can be safely used from freezer to oven, without fear of breakage or cracking.

Can I use DoveWare products on top of the stove?*

Yes, DoveWare Dutch Oven and Stewpot can be used on gas, electric range and ceramic glass stove-tops.

*(It is not recommended to use the DoveWare Casserole dish on the stovetop. Make sure your DoveWare is not heated on the stovetop empty; ensure adequate food or liquid is in it when heating.)

Can DoveWare products go in freezer?

Yes, the DoveWare Stewpot and Dutch Oven can go in the freezer, and can go directly from the freezer to the hot oven, without a warm-up period on the counter, although it is not recommended.

What oven temperature is safe for DoveWare products?

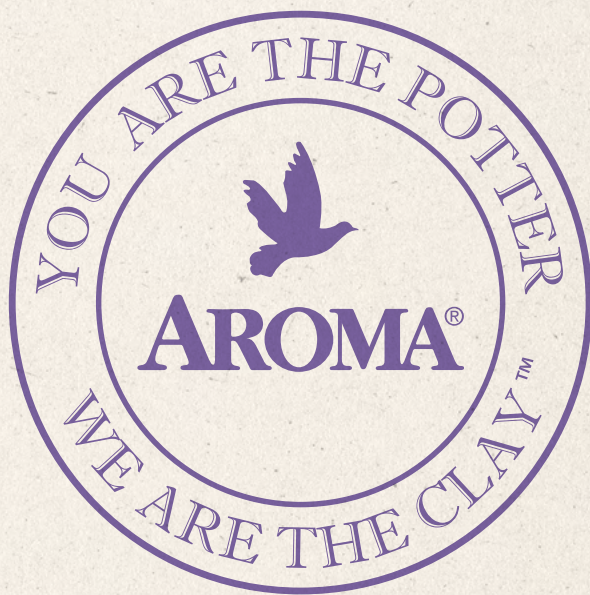

425° F

Are DoveWare handles heat-resistant?

The handles are generally heat-resistant, but may become hot if gas flames touch the vertical sides. An oven mitt should be utilized when handling from stovetop or oven.

Why are there bumps on the inside of the Dutch Oven and Stewpot lids?

These bumps channel condensation created by the steam inside of the stewpot. The moisture is redistributed within the pot evenly. This self basting feature prevents food from drying out and seals in flavors.
